# Brochure

Restauration - Restaurant Automation

Group #14: Jan Matthew Miranda, Kevin Dai, Eric Jiang, Peter Luo, Christian Remolado, Leonardo Roman, Mohammad Sadiq Rehan

Brand New Features

Payment: Our new payment system allows you to pay via the most recent payment systems, including but not limited to Venmo, Android Pay, and Facebook Pay!
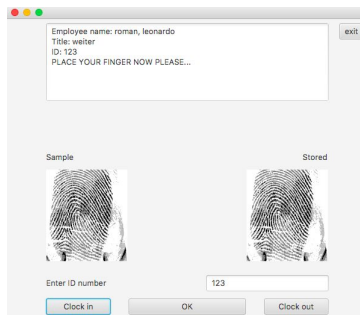

Seat: Our system will automatically seat waiting customers via a reservation and waiting list- no more waiting for a waiter!

Clock in/Clock out: Our new and improved clock in system uses the latest biometrics, guaranteeing employees the most accurate timings.
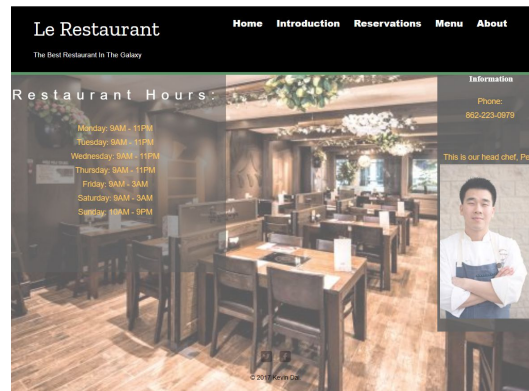

Affordable Pricing

Listen...

We as **college students** know the struggle everyone goes through when trying to save money. Thus, we strive to compete with domestic and international prices in terms of acquiring our product.

Purchase both our MOBILE and DESKTOP application for only a small price of
$299.99

Home Page to Website

$29.99/hour

You too can have your very own automated restaurant!

Restauration

Tired of waiting for your server?
Tired of always calculating tip?
Tired of arguing over how much everyone owes?

**Put a STOP to it.
We can help.**

Easy Communication

Seating plans and customer orders are all flawlessly interwoven into our system database so employees can correspond easily through a phone or tablet.

Figure 1: Table States

With the mobile and desktop app duo communication between waiters, hosts, kitchen staff, and customers will be greatly facilitated.

Who Are We?

We offer a **full software package** to automate your restaurant including a Desktop and Mobile application along with a customized website template.

WHO are we and WHAT do we do?

As more and more people decide to eat out instead of cooking at home, restaurants are continuing to grow in size and numbers. Through our technologies, we believe restaurants who are expanding and plan on taking a larger amount of patrons should adopt our Restaurant Automation Software to increase their efficiency, save money and time.
